

Seamly2D Pattern Cloud Walkthrough

Live system: <https://seamly.cloud/>
<https://my-pattern.cloud/>

Find and export a shared pattern

Log in
Find patterns that have been shared by others
Pin a shared pattern onto your page
Customise the pattern with measurements
Export the pattern for use in Seamly2D/Valentina

Step 1 - Find a shared pattern

Goto the 'Sharing' tab

Show the patterns that are available to you.
(Patterns are shared either with groups or directly to individuals).

Pin the pattern(s).

The screenshot shows the Seamly2D Pattern Cloud interface. The top navigation bar includes a 'beta' badge, a 'test' button, and menu items for 'Design', 'Clients', and 'Help'. The user's name 'Samantha Browne' is displayed in the top right. Below the navigation bar, there are tabs for 'My Patterns', 'Individuals', 'Sharing', 'Me', and 'Feedback'. The 'Sharing' tab is active, displaying a 'Sharing' section with a blue banner that reads: 'Patterns can be shared with contacts or groups. Use this page to manage your contacts (other users, create groups; and select shared patterns). Patterns may be shared with you via Groups or Contacts'. Below this, there are two sections: 'My groups +' and 'Contacts +'. Under 'My groups', there is a table with columns 'Group' and 'Shared'. The first row shows 'Valentina Forum Members' with '3 patterns' shared. A callout bubble points to this row with the text 'Show the patterns shared with this group.' Below the table, it says 'There are 3 patterns shared with you by other designers. You are sharing 0 of your patterns with others. To share...'. A modal window titled 'Shared patterns' is open, showing a list of patterns. The modal has a 'Close' button and a blue banner that reads: 'Pin a pattern in order to be able to customise or download it. To share a pattern with this group use the ../Share menu from your 'My Patterns' page.' Below the banner is a table with columns 'Designer', 'Pattern', 'License', and 'Pin'. The table lists three patterns: '103858' (modellodavanti rev.1), 'kmf' (Leilani_Dress_3 rev.1), and 'MrDoo' (Aldrich basic skirt block low waist rev.1). Each row has a 'Pin' icon and a three-dot menu icon. A callout bubble points to the 'Pin' icon of the first pattern with the text 'Pin the pattern(s) you want to use.'

Designer	Pattern	License	Pin
103858	modellodavanti rev.1		Pin
kmf	Leilani_Dress_3 rev.1	CC BY	Pin
MrDoo	Aldrich basic skirt block low waist rev.1	CC BY	Pin

Step 2 - Customise the pattern to your measurements

This step can be skipped if the pattern does not use any body measurements.

This step is optional for patterns that have been shared with a set of example measurements.

My Patterns Individuals Sharing Me Feedback

Sharing

Patterns can be shared with contacts or groups.
Use this page to manage your contacts (other users of my-pattern.cloud); join or create groups; and select shared patterns.

New customised pattern

Designer: Sam Browne

Pattern: Aldrich basic skirt block low waist

Version: rev.1

Customised for: Samantha Browne

Import measurements

Import an existing .VIT file, or... Enter measurements now

Enter measurements Cancel OK

A 'customised pattern' represents the association of a specific version of a pattern with an individual.

Step 3 - Enter body measurements

Enter the measurements for the individual.

Measurements may be entered in cm or inches.

Notes may be recorded against the set of measurements.

If you already have any measurements for the individual you may bring them forward to this measurement set (individually or all at once).

Measurements Samantha Browne

Pattern Aldrich basic skirt block low waist Rev.1

Date 2017-11-18

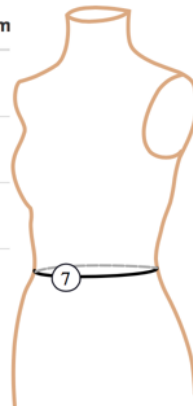

Notes 

Units cm
 inch

Indicates mandatory measurements are not complete

4 measurements need to be provided before the pattern can be exported.

Measurement	cm
Waist circumference (G07)	<input type="text" value="0.0"/> ✓
Highhip circumference (G08)	<input type="text" value="0.0"/>
Hip circumference (G09)	<input type="text" value="0.0"/>
Waist Back to Hip Back (H34)	<input type="text" value="0.0"/>

Images show for each measurement type

show all known measurements for this user.

[Add another measurement type](#)

Step 4 - Export the pattern

Export a .VAL pattern file and a matching .VIT measurements file.
